TELESOLUTIONS PVT. LTD.

At a Glance

It's a truly secure, low cost contact-less and cash-less ecosystem handling both ends – customer and merchant for payments across all verticals – transit / merchant payments / utility and bills / money transfers / banking and more. It's a platform enabling last mile penetration to the masses for frictionless digital financial services.

Our Solution

The NFC reader works on the globally proven model of secure payments to the masses enabling a truly secure contact-less and cash-less ecosystem for payments at all points of the ecosystem – merchant / utility and bills / money transfers / banking / transit and more.

NFC reader hence completes the transaction leg of the merchant end, working on “any” Android device and accepting multiple stored value DESFire as well as EMV cards, for a truly interoperable and an integrated payment ecosystem.

It meets the security and encryption standards as per ISO 12812-2 and the latest guidelines by the Government of India. It's a true platform enabling last mile penetration to the masses for digital financial services.

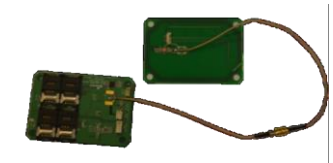

Key Features:

- Multi-protocol support :ISO 14443, MiFare series, DESFire, FeliCa, ISO15693
- NFC (ISO18092) full function support
- Multi-purpose design (Unattended / pole mounted / Desktop standing)
- Contactless EMV L1 Certified
- Compatible with transit services – Metro / BRT / Parking / toll on RS232 / USB

Applications

- Contactless transit payments (Open and closed loop payment)
- NFC Application (mobile wallet – Samsung Pay, Apple Pay)
- Unattended machine (ATM, TVM, Kiosks)
- Bus ticketing / parking / toll

Modules

- DUAL antenna support (e-toll / highway and road access)
 - Dual antenna is very useful for catering to the low height vehicle (car/ jeep) as well as to the high height vehicles (like Truck) from the same reader.
- Water proof housing design (IP65)
- Low energy consumption (5V Power /USB)
- With / without stand

Key Differentiators

- a. Integrated and Interoperable
- b. Secure element / SAM card slot enabled
- c. Integrated with merchant acquiring platform
- d. OTG and non-OTG device compatible
- e. 100% android devices compatible
- f. Can store upto 800 transaction logs within the secure element – off line mode
- g. Over The Air capability
- h. Card and Transaction Management
 - Issuance / Personalization

Applications

- Contactless transit payments (Open and closed loop payment)
- NFC Application (mobile wallet – Samsung Pay, Apple Pay)
- Unattended machine (ATM, TVM, Kiosks)
- Bus ticketing / parking / toll

About Nextgen

With a focus on technology and innovation, and creativity in building differentiated service platforms to bridge gaps in existing services, developing solutions around payments, retailing and transit, integrating mobile technology as a technology platform to enable a cross integration between the two, we pride ourselves in bringing innovative and differentiated services to the banking and the payments industry.
